

If Low Power FM is given priority over current FM translators, many, many people will be negatively impacted. One example is the KLOVE network of listener-supported radio stations. As a resident of Scottsdale, KLOVE has a huge positive impact in terms of its message and music. If this station were replaced by a LPFM programmer, this positive influence would be gone. K-LOVE serves the public interest by providing strictly positive music and messages aimed at building up families and individuals. Please do NOT let LPFM have priority over FM translators.
